

# Critical Remote Monitoring, Endpoint Management and IT Infrastructure Monitoring

Mitigate the risk of cyber threats, proactively solve concerns, stay ahead of outages and minimize downtime with LogMeIn Central.

Voted **#1** Most Reliable Access Tool for SMBs

Powers over **3.3 Billion** remote sessions and counting

Over **10 Million** endpoints under management

## Why Choose LogMeIn Central?

### Built with the SMB in Mind

LogMeIn Central is proud to offer a platform suite of solutions built for SMBs! Streamlined, designed and validated entirely by SMB IT professionals, Central meets the daily needs of IT teams in growing organizations. Competitors in market are complex, difficult to deploy and lengthy to onboard. LogMeIn tackles these barriers and disrupts this space with simple, intuitive and easy-to-use endpoint management and IT infrastructure monitoring.

### Complete Visibility and Control

Knowledge is power and peace of mind. Gain instant visibility into everything on your network as well as what's working and what's not with a single pane of glass view of your IT infrastructure.

### Time and Cost Savings

Manage and troubleshoot computers remotely to eliminate desk/onsite visits, manual installs and waiting for computers to be unmanned. Get the visibility you need to stay one step ahead of potential issues, threats and outages – and get time back in your day to focus on critical projects.

**Increased Productivity**

Eliminate the need to manually dig into issues and resolve concerns before anyone even knows there's a problem. Get to the bottom of issues immediately by knowing the exact point of failure and fix problems without getting an end user involved.

**Immediate Time to Value**

Our intuitive interface ensures your team is up and running quickly so you're able to gain value immediately.

*Did you know?*

**70% of successful breaches begin at the endpoint**, and 57% of cyber-attack victims report that they could have proactively prevented their attack by installing an available patch!

80% of small businesses have experienced downtime, and **the cost is \$82-\$256k for a single event!** By preventing one outage per year, IT infrastructure monitoring **more** than pays for itself.

**Transform your business with the flexibility and freedom to pay for only what you need with LogMeIn Central's focused functionality modules.**

*Start with the base*

**Base**

**Fast, Secure HD Remote Access**

Includes a web-based console with one-click access to any computer, access from both desktop and mobile apps, ability to organize groups of computers, manage users and more.

*Then*

**+**

*Add custom modules*

**Security**

**Take Control and Mitigate Risk of Cyber Threats**

Keep your endpoint infrastructure secure with critical patch management, application updates, windows updates and more.

**Automation**

**Bring Business Productivity to the Next Level**

Automate routine IT tasks to increase productivity and optimize resource allocation through One2Many, advanced scripting, proactive alerts and more.

**Insight**

**Gain Better Visibility**
